

# Mathematics at St John's

*Mrs Slack - Maths Lead - Year 5 Class Teacher*

## **True or false?**

All the numbers in the two times table are even.

There are no numbers in the three times table that are also in the two times table.

## **Always, sometimes, never?**

Is it always, sometimes or never true that an even number that is divisible by 3 is also divisible by 6.

## **Which is correct?**

Which of these number sentences is correct?

$$3 + 6 \times 2 = 15$$

$$6 \times 5 - 7 \times 4 = 92$$

$$8 \times 20 \div 4 \times 3 = 37$$

# Aims

The national curriculum for mathematics aims to ensure that all pupils:

- become **fluent** in the fundamentals of mathematics, including through varied and frequent practice with increasingly complex problems over time, so that pupils develop conceptual understanding and the ability to recall and apply knowledge rapidly and accurately.
- **reason mathematically** by following a line of enquiry, conjecturing relationships and generalisations, and developing an argument, justification or proof using mathematical language
- can **solve problems** by applying their mathematics to a variety of routine and non-routine problems with increasing sophistication, including breaking down problems into a series of simpler steps and persevering in seeking solutions.

Number – number and place value

Number – addition and subtraction

Number – multiplication and division

Number – fractions (including decimals and percentages)

Ratio and proportion

Algebra

Measurement

Geometry – properties of shapes

Geometry – position and direction

10	11	12	13	14	15	16	17	18	19	20

Fluency

Is it simply fast and accurate?

What else do you know?

$$19 + 6 = 25$$

$$9 + 16 = 25$$

$$900 + 600 = 1500$$

$$6 + 9 = 15$$

$$\begin{array}{r} 49 \\ + 26 \\ \hline 75 \end{array} \quad \begin{array}{r} 65 \\ - 29 \\ \hline 36 \end{array}$$

$$9 + 6 = 15$$

$$15 - 9 = 6$$

$$15 - 6 = 9$$

© 2018 The Tiger's Tale

$$7^2$$

$$5^3$$

$$\frac{1}{4} = \frac{\quad}{48}$$

$$\frac{2}{9} + \frac{1}{27} =$$

List the factors of 42.

Find common multiples of 6 and 8.

# Reasoning

**Mathematical reasoning** is the critical skill that enables a student to make use of all other **mathematical** skills. With the development of **mathematical reasoning**, students recognise that **mathematics** makes sense and can be understood.

Spot the mistake / Which is correct?

True or false?

What comes next?

Do, then explain

Make up an example / Write more statements / Create a question / Another and another

Possible answers / Other possibilities

What do you notice?

Continue the pattern

Missing numbers / Missing symbols /

Missing information/Connected calculations

Working backwards / Use the inverse /

Undoing / Unpicking

Hard and easy questions

The answer is...

Visualising

What else do you know? / Use a fact

Fact families

Convince me / Prove it / Generalising / Explain thinking

Make an estimate / Size of an answer

Always, sometimes, never

Making links / Application

Can you find?

What's the same, what's different?

Odd one out

Complete the pattern / Continue the pattern

Another and another

Ordering

Testing conditions

count to and across 100,  
forwards and backwards,  
beginning with 0 or 1, or  
from any given number

count, read and write  
numbers to 100 in  
numerals; count in  
multiples of twos, fives  
and tens

given a number, identify  
one more and one less

5, 6, 7, \_\_, \_\_, \_\_

2, 4, 6, \_\_, \_\_, \_\_

$13 + 1 =$

**Spot the mistake:**

5,6,8,9

What is wrong with this  
sequence of numbers?

**True or False?**

I start at 2 and count in  
twos. I will say 9

**What comes next?**

$10+1 = 11$

$11+1 = 12$

$12+1 = 13$

.....

measure and calculate the **perimeter** of a rectilinear figure (including squares) in centimetres and metres

### Testing conditions

If the width of a rectangle is 3 metres less than the length and the perimeter is between 20 and 30 metres, what could the dimensions of the rectangle be? Convince me.

Find pairs of numbers with a difference of 3.

4m and 7m

5m and 8m

6m and 9m ?

### Possibilities

Adult tickets cost £8 and Children's tickets cost £4. How many adult and children's tickets could I buy for £100 exactly? Can you find more than one way of doing this?

### Missing numbers

$$10 = 5 \times \square$$

What number could be written in the box?

### Making links

I have 30p in my pocket in 5p coins. How many coins do I have?

Complete the table.

	Round 39,476
to the nearest 10,000	
to the nearest 1,000	
to the nearest 100	

This number sentence equals 18

$$\boxed{1} + \boxed{1 \mid 7} = \boxed{1 \mid 8}$$

Now write a **different** number sentence that equals 18

Write **one digit** in each empty box.

$$\boxed{\phantom{0}} + \boxed{1 \mid \phantom{0}} = \boxed{1 \mid 8}$$

**True or false?** Year 2

All the numbers in the two times table are even.

There are no numbers in the three times table that are also in the two times table.

**Always, sometimes, never?** Year 3

Is it always, sometimes or never true that an even number that is divisible by 3 is also divisible by 6.

Is it always, sometimes or never true that the sum of four even numbers is divisible by 4.

**Which is correct?** Year 6

Which of these number sentences is correct?

$$3 + 6 \times 2 = 15$$

$$6 \times 5 - 7 \times 4 = 92$$

$$8 \times 20 \div 4 \times 3 = 37$$

Olivia buys a banana, an apple and a bag of nuts.

30p

45p

60p

She pays with three 50p coins.

What is her change?

Show your method

**p**

Kemi needs **450** millilitres of water.

How much **more** water does she needs to put in the jug?

millilitres
